No	29 (74.4)	38 (74.5)			14 (87.5)	30 (73.2)		

Numerical parameters were described with mean ± standard deviation or median (interquartile range), depending on normality. MD – mean/median difference (TNBC vs FA); CI – confidence interval. Groups compared with t-Student test1, Mann-Whitney U test2, Pearson Chi-square test or Fisher's exact test3, as appropriate.
* Proportions vs all observations with irregular margins.
** Proportions vs all observations with available data on AngioPlus (TNBC: n = 31, FA: n = 47).
